Azerbaijan

Azərbaycan Radiosu

Azərbaycan Radiosu is the state radio service of Azerbaijan TV and Radio Broadcasting. All broadcasting is on FM only with mediumwave and shortwave transmitters having closed.

Ictimai Radio

Ictimai Radio is a Baku-based FM station that is irregularly heard on shortwave with a wideband FM transmission to interfere with broadcasts from Voice of Justice and Voice of Talyshistan. It was last heard on 9677v kHz in April 2018.

Nagorno-Karabakh

Nagorno-Karabakh is a landlocked region in the South Caucasus. It is internationally recognized as part of Azerbaijan, but most of the region is governed by the Nagorno-Karabakh Republic, a de facto independent nation established on the basis of the Nagorno-Karabakh Autonomous Oblast of the Azerbaijan Soviet Socialist Republic. Azerbaijan has not exercised political authority over the region since the advent of the Karabakh movement in 1988. (Wikipedia).

Voice of Justice

Voice of Justice started broadcasting in August 1997 to promote a better understanding between Azerbaijan and Armenia on the Nagorno-Karabakh issue. It has been several years since Voice of Justice has been positively heard on shortwave from a 5 kW transmitter in Stepanakert. It had broadcast on 9677 kHz and suffered deliberate interference at times from Radio Ictimai.

Voice of Talyshistan

Voice of Talyshistan started broadcasting from Shushi, Nagorno Karabakh, in March 2013 at the initiative of the Iranian Studies Chair of the Yerevan State University and the Modus Vivendi Center. The main target audience is the 1.5 million Talysh population in Azerbaijan. It has not been reported recently but had broadcast on 9677v kHz, presumably using the same 5 kW transmitter in Stepanakert as Voice of Justice.

Target broadcast to Azerbaijan

Voice of Free Talyshistan

Voice of Free Talyshistan is mentioned in WRTH 2020 as a programme produced by the Yerevan-based NGO "Modus Videndi Center" (also see entry for "Voice of Talyshistan" above - connected?).

Turkish Republic of Northern Cyprus

Bayrak Radio and Television Corporation

Bayrak Radio and Television Corporation is the official radio and television broadcasting corporation of the self proclaimed Turkish Republic of Northern Cyprus. All stations now operate on FM. BRTC once broadcast on shortwave (6150 kHz) from a 25 kW transmitter, but it is now inactive.

Georgia

Georgian Public Broadcaster

Tbilisi-based Georgian Public Broadcaster (GPB) is the public broadcasting service in Georgia. GPB operates two radio channels: Sakartvelos Radio - Pirveli Radio and Radio Ori - Kartuli Radio, both on FM. The Radio Georgia foreign service was closed in 2005.

Abkhazia

Abkhazia is a partially recognised state controlled by a separatist government on the eastern coast of the Black Sea and the south-western flank of the Caucasus. It considers itself an independent state, called the Republic of Abkhazia or Apsny. This status is recognised by Russia, Nicaragua, Venezuela, Nauru. The Georgian government, the UN and the majority of the world's governments consider Abkhazia a part of Georgia's territory, though Georgia does not control it. Under Georgia's official designation it is an autonomous republic, called the Autonomous Republic of Abkhazia.

Abkhaz Radio (Apsua Radio)

Abkhaz Radio has been on the air since 1992 broadcasting from Sukhumi, capital of the self-declared Republic of Abkhazia in NW Georgia. It broadcasts programmes in Abkhaz, Georgian and Russian, and when not carrying its own programmes relays various others services from the neighbouring Russian North Caucasus region. The shortwave transmitter on 9535v kHz has not been heard recently.

Transmitter site: Sukhumi - 30 kW.

Time/UTC	Days	Language	kHz
0400-0600	Mon-Fri	Abkhaz/Georgian/Russian	1350 (or 1296/1301v)
0500-0700	Sat/Sun	Abkhaz/Georgian/Russian	1350 (or 1296/1301v)
1500-1700	Daily	Abkhaz/Georgian/Russian	1350 (or 1296/1301v)

All times vary. Usually before sign-on, Avto Radio from Moscow, is heard in Russian for 10-20 minutes as a warm up, eg from Mon-Fr 0350, Sat/Sun 0450, daily 1450. (Rumen Pankov).

Apsua Radio heard on 1296v

Note: on 7 October 2021, Eduard (RealDX iog) reported "1301 (1302) kHz - Apsua radio (Abkhazia) on strange frequency with rather good signal (better, than usual 1350 kHz). Possibly transmitter malfunction"; Eduard's audio clip of Apsua Radio is [here](#) (Eduard's YouTube comments say "15:08 UTC - Abkhazia on strange frequency, possibly transmitter malfunction. There was no Apsua signal on 1350 kHz. Carrier - 1301 kHz, better reception - 1302 kHz. Received in Moscow region 07.10.21 on Degen 1103, built-in whip antenna").

Further reports indicate reception of Apsua Radio on 1296 kHz.

Iran

Islamic Republic of Iran Broadcasting

IRIB is an Iranian media corporation which holds the monopoly of domestic radio and television in the Islamic Republic of Iran. IRIB says it is independent of the Iranian government.

Target broadcasts to Iran

Iran International

Iran International was first heard on shortwave on 19 November 2019 with an audio feed from its London-based satellite TV service, seemingly in response to an Internet blackout in Iran caused by civil unrest in several towns and cities. Iran International's website says its service was launched in May 2017 and "its mix of rolling news, current affairs and documentaries, sport, lifestyle, health and technology, (is) programmed to attract a wide audience, especially younger people. Iran International is a privately-owned UK entity, the first of a family of channels aiming eventually to target other communities and other languages". As well as shortwave, Iran International has also been heard on mediumwave, with both 1395 and 990 kHz being reported, although at the time of editing they appear to be on shortwave only.

Transmitter sites: Tashkent, Uzbekistan (tac) - 100 kW.

Iraq

Iraqi Media Network - Republic of Iraq Radio

Republic of Iraq Radio is the state broadcasting radio station in Iraq, operated by the Iraqi Media Network. It broadcasts mainly on FM, with a single mediumwave transmitter still operational on 792 kHz in Baghdad. There is no shortwave broadcasting from Iraq with Republic of Iraq Radio ceasing just before the fall of the Saddam Hussein regime.

Transmitter site: Baghdad - 20 kW.

Israel

Kan

State broadcasting in Israel is operated by the Israeli Public Broadcasting Corporation, branded as Kan, an Israeli governmental body founded in 2015 to replace the Israel Broadcasting Authority after the Israeli Public Broadcasting law ordered its closure. Its debut date was postponed several times but eventually opened on 15 May 2017.

All domestic mediumwave services in Israel have now been discontinued. All shortwave services, with the exception of Persian, ended on 31 March 2008. The Persian service was later closed on 30 June 2013.

International broadcasting on mediumwave

Voice of Hope - Middle East

Voice of Hope - Middle East was inaugurated in March 2017 with a transmitter located at She'ar Yashuv in Upper Galilee operating on 1287 kHz (60 kW). It is off-air as of April 2021.

Jordan

Jordan Radio and Television Corporation

Jordan Radio and Television Corporation (JRTC) is the state broadcaster of Jordan. Radio Jordan had operated on a single mediumwave frequency of 612 kHz until recently with all other mediumwave and shortwave transmitters having been discontinued. However, on 25 October 2021, Alexei Lubich reported to mediumwave.info that 612 kHz had itself been off air since the beginning of October.

Kurdistan

Kurdistan or Greater Kurdistan is a roughly defined geo-cultural historical region wherein the Kurdish people form a prominent majority population and Kurdish culture, languages, and national identity have historically been based. Kurdistan roughly encompasses the northwestern Zagros and the eastern Taurus mountain ranges. The territory corresponds to Kurdish irredentist claims. Contemporary use of the term refers to the following areas: southeastern Turkey (Northern Kurdistan), northern Iraq (Southern Kurdistan), northwestern Iran (Eastern Kurdistan), and northern Syria (Rojava or Western Kurdistan). Some Kurdish nationalist organisations seek to create an independent nation state consisting of some or all of these areas with a Kurdish majority, while others campaign for greater autonomy within the existing national boundaries. (Wikipedia)

Target broadcast to Kurds in the Middle East

Radio Dengê Welat

Radio Dengê Welat broadcasts in various Kurdish dialects and Turkish, and targets the Kurdish population in the Middle East. Radio Dengê Welat studios are located in the town of Denderleeuw 20 km north-east of Brussels. It replaced Dengê Kurdistanê (Voice of Kurdistan) on shortwave in the latter part of 2017.

Transmitter sites: Issoudun, France (iss) - 250 kW; Grigoriopol, PMR (kch) - 300 kW.

A station referred to by listeners as "Radio Recep Erdogan" has been heard shadowing Radio Dengê Welat. It appears to be a counter-broadcast from Turkey with military music, the Turkish national anthem and speeches by President Erdogan. The Turkish jamming, or counter-broadcast appears to be a 30 (or 60) minute loop recording without any station ID. The same broadcast is being carried on the Turksat satellite at 42 degrees East on a transponder which previously carried a feed of the former TRT Arabic mediumwave service. On 24/25 May 2021 it was reported that a feed of TRT Voice of Turkey in various foreign languages was being heard instead, presumably due to an error in the control room.

VOA Kurdish

VOA's Kurdish service was established in 1992. In addition to shortwave, the programmes air on FM affiliates in several cities in Iraq (Erbil, Sulaymaniyah, Kirkuk, Mosul, Baghdad, and Basra). VOA Kurdish also produces video reports that are streamed on both of its websites (Kurmanji and Sorani). The service's target audience consists of more than 30 million Kurds living in the Middle East and Eurasia and approximately one million Kurds living in Europe and North America. Audience research indicates that the broadcasts are popular among listeners in Iran, Iraq, Syria, and Turkey. The daily radio shows offer extensive regional and international news coverage, interviews with experts and newsmakers, stringer reports and panel discussions with Kurds in the greater Middle East and in the diaspora,

Saudi Arabia

Saudi Broadcasting Authority

The Saudi Broadcasting Authority (SBA) is a governmental entity of Saudi Arabia, organised under the Ministry of Culture and Information. The SBA was originally known as the Broadcasting Service of the Kingdom of Saudi Arabia (BSKSA), but was rebranded as the Saudi Broadcasting Corporation sometime towards the end of 2014/early 2015. It then got renamed again as the Saudi Broadcasting Authority in August 2018, with the abbreviation of the new name SBA designed to remove confusion with the recently-launched Saudi Broadcasting Channel (SBC).

Saudi Broadcasting Authority on Mediumwave

The SBA domestic radio network includes the following stations which operate on mediumwave:

General Programme - Radio Riyadh: operating from studios in Riyadh.

Second Programme - Radio Jeddah: operating from studios in Jeddah.

Holy Qur'an Radio: broadcasts the Quran and other Islamic content from studios in Riyadh.

Nedaa Al-Islam Radio - Call of Islam: Islamic programming from studios in Mecca.

Radio Recep Erdogan

A station referred to by listeners as "Radio Recep Erdogan" has been heard shadowing Radio Dengê Welat (see entry for Kurdistan). It appears to be a counter-broadcast from Turkey with military music, the Turkish national anthem and speeches by President Erdogan. At times the two broadcasts have played cat and mouse, varying their frequencies but often clashing on the same frequency. The Turkish jamming, or counter-broadcast appears to be a 30 (or 60) minute loop recording without any station ID. The same broadcast is being carried on the Turksat satellite at 42 degrees East on a transponder which previously carried a feed of the former TRT Arabic mediumwave service. So it would seem that TRT is closely involved in this jamming operation, which is likely to be using a TRT SW transmitter at Emirler.

Yemen

Republic of Yemen Radio (Radio Sana'a) is the state broadcasting service of Yemen. During the current crisis all mediumwave and shortwave transmitters in Yemen are believed to be inactive.

Target broadcasts to Yemen

Republic of Yemen Radio - Radio Sana'a - Pro-Hadi

Chris Greenway reported via DX Listening Digest on 20 October 2015 the existence of a broadcast on shortwave in support of Yemeni President Abdrabbuh Mansur Hadi. President Hadi was deposed by Houthi rebels in 2014 and subsequently fled to Saudi Arabia in March 2015. Tarek Zeidan reported an ID from the station on 20 October 2015 as "Huna Sana'a idhaat aljumhuriya alyamaniya al bernamaj al a'am" ("This is Sana'a, Republic of Yemen Radio General Programme"). According to an online source the pro-Hadi transmission on shortwave is from Aden, but based on the fact that Yemen is having problems with power and a lot of blackouts, leaving the greater part of Yemen without electricity, it must be coming from a nearby country, presumably Saudi Arabia.

Transmitter site: subject to confirmation, but believed to Jeddah, Saudi Arabia.

Time/UTC Days Language kHz

0300-2300 Daily Arabic 11860-jed

Note: times of operation to be confirmed.

Sawt Al Jomhouria (Voice of the Republic)

Sawt Al Jomhouria (Voice of the Republic) broadcasts in support of pro Saudi/Arab coalition forces in Yemen. Online sources say that the station was set up by Yemeni "National Resistance Forces - Republic's Guards" in "Al Hudayda" region and started transmissions on 5 June 2018 on 104.1 MHz (Rawad Hamdi, WRTH FB, 26 October 2018)

Transmitter site: Dhabbaya, Abu Dhabi (800 kW)
