

# Sheigra DXpedition Report

10<sup>th</sup> to 23<sup>rd</sup> October 2020 - with Dave Kenny & Alan Pennington

We half-expected to have to cancel the 59th DXpedition to Sheigra on account of the ever-changing Covid-19 regulations, but fortunately there were no restrictions in October on travel from southern England to the remote, far north western tip of the Scottish mainland, just south of Cape Wrath.

*left: Sheigra viewed from 2/3rds along the 90° Beverage. Our cottage is nearest.*

But the cottage we've stayed at for the past seven years in Sheigra was unavailable this year as the owner is living there at present. So we were grateful to Murdo for arranging for us to stay in a nearby cottage instead. This cottage we had used before as a DX base for nine DXpeditions between 2002 and 2013, although these days it isn't usually available for holiday lets. From here it's always been trickier to put up Beverage aerials towards the Americas because a road needs to be crossed (albeit there is hardly any traffic apart from the weekly bin lorry and the occasional stray tourist, as it's where the road north ends). However, it backs directly onto open moorland to the east and south, so is well positioned for putting up Beverage aerials targeting Asia and Africa. Instead of running wires across the road towards the north west as we've done in the past, we used a EWE loop fed by a coax from the cottage. Additionally, we could receive signals from the Americas off the back of unterminated Asian/African aerials, with

some success. The EWE often gave clearer though weaker reception from the Americas in the mornings: switching between aerials and comparing signals as they faded in and out is one of the benefits of listening in real-time!

All our logs are made in real time using AOR 7030plus receivers. We record using Sony mini disc recorders, long considered obsolete, with blank discs increasingly difficult to source, but ideal for real-time DXing. But with their built-in pre-recording delay you never miss an ID - just press record *after* hearing an ID as the previous 12 seconds are already recorded.

Conditions during the whole of the first week were stable with good reception from the Far East every afternoon from about 1430 right through to about 2200 UTC. The 12<sup>th</sup> and 14<sup>th</sup> were particularly good for reception of the Philippines and Japan. **And the highlight on 12<sup>th</sup> was 5RN ABC Radio National from Adelaide heard on 729 kHz!** As well as being a 'Sheigra First', this may also be the first time Australia has been heard on MW in the UK since the 1930s? Reception was confirmed by matching audio clips with two programmes still available on the ABC website. Though it should have been obvious listening at the time when an Australian accented lady was noted in Alan's logbook mentioning "Guardian Australia" and the "Sydney Opera House"! Reception was confirmed in November with an email QSL from Graham Himmelhoch-Mutton at ABC (see page 9-10 below)

The Americas were audible from about 2200-0930ish, varying slightly from day to day. The 12<sup>th</sup> and 14<sup>th</sup> again were good for reception from the Prairies. Good indicators of conditions each morning was what could be heard on 1000 kHz (KOMO Seattle or WMVP Chicago) and how well the distinctive classical music format on 1250 from Manitoba's CHSM was being heard. Reception conditions flattened off in the second week, but there was still a cacophony of signals in our headphones vying for attention and keeping the logbook ticking over!

The weather conditions were also particularly good to us during the first week, with daytime temperatures around +10C and most days unusually calm and sunny, enabling us to get out onto the hills to enjoy the stunning Highland scenery. A high pressure system also meant we heard the Faroe Islands on FM just on a portable from a high clifftop vantage point on the 15th.

The second week's weather was more unsettled with the rain and gusty winds we are more used to at Sheigra. The windsock poles used on our EWE flex alarmingly in the gales, but remained intact.

Unusually, there were no breaks at all during the fortnight on our three Beverage wires. The usual culprits, deer, were not seen (or heard) on the hillsides around Sheigra: just two stags spotted near the lochans to the north of the village one afternoon. And the sheep also left our Beverage wires and supporting canes well alone! Though other wildlife did put in an appearance – a stoat in the cottage garden and a Merlin attracted by the other birds feeding there.

The cottage we were using now has solar panels on the roof, and we suspect some buzzing QRM on sunny afternoons when tuning to Asia resulted from these. But the ponies, and their ticking electric fence QRM from recent DXpeditions, had left Sheigra. Our cottage had no internet and no mobile 'phone reception though, frustrating when wanting to check online parallels during DXing sessions!

Our logs of identified MW stations below. Additional logs may result from relistening to recordings.

<b>Receivers</b>	Alan Pennington	AOR AR 7030 Plus and Palstar pre-amp
	Dave Kenny	AOR AR 7030 Plus and tuneable pre-amp

**Aerials** (long-wire Beverages use 7-strand 0.2mm wire supported on 4-5ft bamboo canes)

No 1 - 50 degrees	550m Beverage - terminated	Far East & SE Asia
No 2 - 90 degrees	420m Beverage - unterminated	Middle East & South Asia (C America off the back)
No 3 - 150 degrees	350m Beverage - unterminated	Africa (N America off the back)
No 4 - NW	EWE	North America & general SW DX

*Stations logged at Sheigra for the first time are highlighted in bold*

## Sheigra update: Australia heard on MW in UK!

After the initial Sheigra DX-pedition report was published in 'Communication' (November 2020), I had time to listen again to some 'Unidentified' recordings from our fortnight in North West Scotland. One clip included an Australian accented lady in English, down in the mix of stations on 729kHz at 1623UTC on 12<sup>th</sup> October. My logbook just contained odd words I'd written listening live at the time: 'Guardian Australia' and the 'Sydney Opera House'. But it hadn't clicked at the time (surprisingly!) it might be 50 kilowatt 5RN Adelaide as we'd never heard Australia at Sheigra before. All I knew for sure at the time was it wasn't BBC Essex (by checking 729 on another aerial, then switching back to our 550m 50° Beverage)!

On 729kHz on previous Sheigra DX-peditions, AIR Guwahati and Voice of Vietnam had been logged. And on this one, NHK 1 Nagoya, Japan was a new log half an hour later, also on 12<sup>th</sup> October, at 1700 UTC. Back home (and now with internet access!) I checked ABC Radio National's online schedule to try and match three recordings I had. 1623UTC was 0253 local time on 13<sup>th</sup> October in Adelaide (UTC +10:30), but the ABC website unhelpfully converted their schedule back to BST and the 12th October when it knew I was in the UK! But eventually I matched my recordings to two programmes either side of 0300 local Adelaide time. Luckily, ABC have a "listen again" feature for recent Radio National programmes, so **5RN ABC Radio National Adelaide 729kHz** was 100% confirmed! The voice I'd heard at 1623UTC was Larissa Behrendt's ending a "Speaking Out" episode, and at 1638UTC, "Big Ideas" on sustainable fashion had faded in.

This is the first time Australia has been heard at Sheigra on medium wave (and as far as we are aware, maybe the first reception of Australia on medium wave in the UK since the 1930s)! Thanks to Graham Himmelhoch-Mutton at ABC for confirming my report (sent with 3 x MP3 clips) with the email QSL below.

**Subject:** RE: 5RN Adelaide 729kHz heard in Scotland  
**From:** Graham Himmelhoch-Mutton <Himmelhoch-Mutton.Graham@abc.net.au>  
**Date:** 08/11/2020, 08:06  
**To:** Alan Pennington <alan.pennington1@ntlworld.com>

Hello Alan,

I am happy to verify your reception of:

**5RN Adelaide 729kHz** @ 1623Z on 12th October, 2020. 5RN broadcasts from our site at Pimpala in the southern suburbs of Adelaide in South Australia at a power of 50kW.

5RN 729 is regularly heard in the far north of Norway, Sweden and Finland, but indeed, this is the first report I've had from the U.K. in many years. Most of the Scandinavian DXers are using Perseus systems with multiple Beverage antennas which of course makes the task considerably easier, but there is no doubt in my mind that many of our signals would routinely reach Scotland, albeit with higher QRM than they have in the Arctic. That said, I do also receive reports from Denmark and Belgium, so I've little doubt you could log more of our stations with a concerted effort, and I would be happy to assist with suggested targets if you wish to mount an Aussie-focussed DXpedition in the future.

I wish you well in your DXing and look forward to receiving future reports from you.

Kind regards,

Graham.

## Australia heard on MW in UK!

(continued)

Reception of 5RN Radio National, Adelaide on 729kHz at 1623UTC on 12<sup>th</sup> October was about an hour before sunset in Sheigra. So most of the reception path was in darkness. Great Circle map distance from Sheigra to the 5RN transmitter site in the Adelaide suburbs at the Pimpala site (Reynella) is around 10,120 miles. 5RN's mast is a 'Monopole - Guyed Diplex Lattice Radiator Mast with Capacitive Top Hat loading' (re Dan Goldfarb's [www.mwmasts.com](http://www.mwmasts.com)). The same mast is, unusually, also used by local ABC Radio Adelaide on 891kHz.

Now that we have heard an Antipodean station at Sheigra, we will be more aware of possible reception from down under in future!

(Alan Pennington)

*Above: Sheigra listening post: Alan tuned to 990 kHz India in the afternoon.*

Above: *Loch Inchard from Badcall (south of Sheigra and the fishing port of Kinlochbervie)*

**Shortwave logs** Whilst we mainly listened to MW at Sheigra, we do also tune around on SW:
